	<b>Examiner</b> Alfred Joseph Wujciak III	<b>Art Unit</b> 3632	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "spine" in line 2. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 6 and 8-20 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 1,900,401 to Scully.

Scully teaches a case comprising a base panel (2) having an inner surface, outer surface and at least four outer edges, a cover panel/means for protecting (4) operably interconnected to

Art Unit: 3632

the base panel, having an inner surface, an outer surface and at least four outer edges, a supporting mechanism (15, 17) having an upper end and a lower end, the lower end operably interconnected to the inside surface of the base panel, an attachment mechanism (6) and a rotation mechanism (9, 11-12, see figure 5) operably interconnected to the supporting mechanism and the attachment means. The case includes a closure mechanism (5) for securing the base panel to the cover panel. The attachment mechanism includes at least an attachment plate and a fastening device (9) comprising a bolt. The rotating mechanism includes a locking mechanism (19-20). The supporting mechanism includes at least a primary portion (17) and an inclining portion (15). The case includes a second means/a second rotation mechanism (3) for selectively rotating the inclining means interconnected between the protection means and the inclining means.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Scully.

Scully teaches the attachment mechanism having a resilient arm (8, spring clip) but fails to teach plurality of resilient arms. It would have been obvious for one of ordinary skill in the art at the time the invention was made to have added plurality of resilient arm to provide additional support for retaining an object on the attachment mechanism.

***Allowable Subject Matter***

Claims 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

In regards to claim 4, the prior art fails to teach the case comprising at least one pocket integrated into the inner surface of the cover. In regards to claim 5, the prior art fails to teach the case including at least one sleeve integrated into the inner surface of the cover.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alfred Joseph Wujciak III whose telephone number is (571) 272-6827. The examiner can normally be reached on 8am-4:30pm.
